7 Channels | 5 Segments

1. Executive Summary

This report presents the findings of a comprehensive Customer Journey & Funnel Analysis conducted across 7 acquisition channels and 5 customer segments, covering 150 observed customer interactions during the 2024 calendar year. The analysis reveals significant inefficiencies in funnel conversion, checkout abandonment, and channel ROI that, if addressed, present an estimated 15–25% revenue improvement opportunity and a path to 20%+ conversion rate optimisation.

Key findings indicate that overall conversion rates sit at 10% — well below the 15–20% industry benchmark for e-commerce. The checkout stage represents the single largest drop-off point, with 58% of customers who initiate checkout failing to complete purchase. Email Campaign consistently outperforms all other channels. A structured 8-point improvement roadmap has been developed to address these findings.

2. Key Findings

F1 HIGH	Conversion Rate Below Industry Benchmark Overall conversion rate is 10.0%, against an industry benchmark of 15–20% for e-commerce and SaaS. Premium and Email-acquired segments show higher rates but are offset by low conversion across Social Media and Display Ad channels.
F2 HIGH	Checkout Drop-off Is the Primary Revenue Leak Of 41 customers who initiated checkout, only 15 completed purchase — a 63.4% abandonment rate at the final funnel stage. This represents the highest-value improvement opportunity: every 10% improvement in checkout completion adds an estimated ₹50,000+ in annual revenue.
F3 HIGH	Social Media Drives Volume But Not Conversion Social Media is among the top traffic-driving channels but shows one of the lowest conversion rates. Customers arriving via Social Media are in early Awareness stage and are not purchase-intent ready, resulting in wasted retargeting spend.
F4 MEDIUM	Low Customer Feedback Score (6.2 / 10) Average feedback score of 6.2 is below the 7.5 satisfaction threshold. Churned customers score significantly lower. This signals post-interaction experience gaps that are driving retention failure — 89.3% of all visitors are classified as Churned.
F5 MEDIUM	Revenue Concentration in Premium Segment The Premium segment generates a disproportionate share of total revenue despite representing approximately 20% of visitors. The remaining 80% of visitors from Basic, Standard, and SMB segments are significantly under-monetised.

3. Improvement Recommendations

The following recommendations are prioritised by business impact and feasibility, derived directly from the funnel KPI analysis and channel-level bottleneck identification.

#	Finding	Impacted Area	Priority	Recommendation	Expected Benefit	Timeline
1	High checkout drop-off (63%)	Checkout / UX	HIGH	Implement one-click checkout, trust badges, and transparent shipping cost display on cart page	Conv Rate +15–20%	Q3 2025
2	Low overall conversion (10%)	All Channels	HIGH	Deploy personalised retargeting campaigns segmented by funnel stage; use abandoned cart email sequences	Revenue +20%	Q3 2025
3	Social Media low ROI	Marketing	HIGH	Reallocate 20% of Social Media budget to Email and Referral channels; use Social only for Awareness-stage content	CAC -25%	Q2 2025
4	Low feedback score (6.2/10)	CX / Product	MEDIUM	Implement post-purchase NPS survey; create a customer success touchpoint 7 days after purchase	CSAT to 8.0+	Q3 2025
5	89% churn rate	CRM / Retention	MEDIUM	Build automated loyalty email sequence for converted customers; introduce a referral reward programme	Retention +20%	Q3 2025
6	Premium segment under-invested	Sales / Mktg	MEDIUM	Create a VIP programme with early access, exclusive discounts, and dedicated account management	Revenue +15%	Q4 2025
7	High Add-to-Cart drop-off (51%)	Product / UX	LOW	A/B test product page layout, image quality, and CTA button copy; add social proof (reviews, ratings)	ATC Rate +10%	Q4 2025
8	Weak Email list growth	Marketing	LOW	Add email capture popups with lead magnets (discount codes, free guides) on high-traffic landing pages	Email Conv +30%	Q1 2026

4. Channel & Segment Performance Summary

4.1 Acquisition Channel Performance

Email Campaign and Referral channels consistently deliver the highest conversion rates, average purchase values, and retention rates. Social Media and Display Ad channels show high bounce rates and low conversion — indicating a poor fit between ad audience targeting and purchase intent.

Channel / Segment	Conv Rate	Total Revenue	Avg Purchase	Retention	Bounce Rate	Feedback Score
Organic Search	~14%	₹62,400	₹22,300	~12%	~2%	7.1
Email Campaign	~22%	₹98,700	₹35,800	~18%	~1%	8.2
Paid Search	~11%	₹54,200	₹28,100	~10%	~4%	6.8
Social Media	~5%	₹21,100	₹18,400	~6%	~8%	5.9
Referral	~18%	₹76,500	₹31,200	~15%	~2%	7.8
Direct	~12%	₹44,300	₹24,600	~11%	~3%	6.5
Display Ad	~4%	₹18,200	₹16,900	~5%	~9%	5.4

4.2 Customer Segment Performance

Premium segment customers convert at nearly 2x the rate of Basic segment customers and generate significantly higher average purchase values. Enterprise customers show the highest feedback scores, suggesting strong post-purchase experience alignment with business buyer expectations.

Channel / Segment	Conv Rate	Total Revenue	Avg Purchase	Retention	Bounce Rate	Feedback Score
Premium Segment	~18%	₹1,82,000	₹41,200	~22%	~1%	8.1
Enterprise Segment	~15%	₹98,400	₹38,600	~19%	~2%	8.4
Standard Segment	~9%	₹76,300	₹24,100	~9%	~4%	6.3
SMB Segment	~8%	₹54,700	₹21,800	~8%	~5%	6.1
Basic Segment	~5%	₹24,200	₹14,700	~5%	~7%	5.7

5. Methodology

Customer Journey Mapping

Documented the end-to-end 5-stage funnel (Awareness → Interest → Consideration → Intent → Purchase) across all 7 acquisition channels, identifying key interaction points, drop-off stages, and decision triggers.

KPI Framework

Defined 15 performance KPIs including Conversion Rate, Add-to-Cart Rate, Checkout Rate, Funnel Drop-off Rate, Total Revenue, Average Purchase Value, Revenue per Customer, Retention Rate, Bounce Rate, and Avg Feedback Score.

Bottleneck Analysis

Ranked funnel stages by drop-off volume and conversion percentage, identifying the top 3 bottleneck transitions (Visit→Cart, Cart→Checkout, Checkout→Purchase) for targeted improvement.

Root Cause Analysis

Cross-referenced funnel drop-off rates with acquisition channel, customer segment, region, and session behaviour data to distinguish capacity issues from quality and UX issues.

Revenue & Segment Analysis

Performed segment-based revenue segmentation by customer type and acquisition channel to identify high-value, under-invested segments and channels.

Improvement Tagging

Each recommendation was tagged with a primary improvement category (UX, Automation, CRM, Campaign Optimisation, Product) to quantify the opportunity landscape and prioritise implementation sequencing.

6. Implementation Roadmap

Phase	Focus Areas	Actions	Teams	Expected Outcome
Phase 1 Quick Wins Q2–Q3 2025	Checkout Optimisation Channel Reallocation	Deploy trust badges and transparent pricing on checkout page Add abandoned cart email automation Reallocate Social Media budget to Email and Referral	Marketing, Product, UX	Conv Rate +15% Checkout Drop-off -20%
Phase 2 Experience Redesign Q3 2025	CX Improvement Retention Programme	Launch post-purchase NPS survey workflow Build automated 7-day customer success email sequence Implement referral reward programme	CRM, CX, Product	CSAT 6.2 → 8.0+ Retention +20%
Phase 3 Growth Q4 2025	Segment Monetisation Lead Generation	Launch Premium VIP programme with exclusive access A/B test product page layout and CTA copy Deploy email list growth popups with lead magnets	Sales, Marketing, Product	Revenue +20% ATC Rate +10%
Phase 4 Continuous Improvement 2026 Ongoing	Analytics Maturity Predictive Modelling	Monthly funnel KPI reviews with automated dashboards Deploy predictive churn model Integrate CLV (Customer Lifetime Value) scoring into CRM	All Teams, Data Analytics	Sustained 20%+ Conversion Rate 90%+ Retention

7. Conclusion

The Customer Journey & Funnel Analysis reveals a significant opportunity for revenue improvement and customer experience optimisation. By systematically addressing the 8 identified priority areas — spanning checkout conversion, channel reallocation, retention, and segment monetisation — the organisation can realistically achieve:

- Conversion rate improvement from 10.0% to 20%+ within 12 months
- Checkout abandonment reduction from 63% to below 40% through UX and trust improvements
- Customer retention rate improvement from 10.7% to 30%+ through CRM automation
- 15–25% revenue growth through Premium segment investment and Email channel scale-up
- Avg Feedback Score improvement from 6.2 to 8.0+ through post-purchase experience redesign

This dashboard and the accompanying recommendations report provide a data-backed foundation for management decision-making and serve as the starting point for a structured Customer Experience Excellence programme.
